

## BELMONT OFFICIALS OPERATING IN NEW CAMP OF ROCHESTER AND TRANSACT BIGGEST DEAL IN CAMP

The officials of the Tonopah Belmont company have become interested in the new camp at Rochester, according to the Rochester Miner. The deal was consummated by C. H. McIntosh. Concerning the transaction the Miner has the following: There is ample excuse for Rochester setting off fireworks in advance of Independence day, for it certainly has something to celebrate.

Through the unaided efforts of C. H. McIntosh of Lovelock, there was brought into camp Monday a big sack of money, the first payment on the property of Crown Point Extension Mining company, which consists of a claim and two fractions, about thirty acres in all.

The deal also includes first payment on the three extension claims which sideline the two Esperanzas on the east.

This property was partially developed by the Crown Reserve company of Cobalt, Ontario.

Although the deal was made by Mr. McIntosh, who labored day and night since the camp of Rochester was struck to make mines of his holdings there, he has been ably assisted by his associate, Senator W. C. Pitt.

Organ and Farris, the townsite men of East Rochester, owned the Crown Point Extension. They have made themselves immune from the terror of the wolf at the door by this transaction.

Through the instrumentality of Mr. McIntosh, \$70,000 of real money has been invested in the camp, the greatest amount of actual cash that has been interested thus far, despite stories that have gone forth from other sources of deals up in the six figures. This is for real money and the gold coin has been paid over.

When it was learned that the Tonopah Belmont Development company, rather than the men that own the control in that great corporation, which resulted through the operations in the rejuvenation of Tonopah, are the purchasers through the instrumentality of Mr. McIntosh, the full

Import of the deal will be appreciated.

The Tonopah Belmont people have been long seeking an entrance into Rochester and their negotiations have all been through Mr. McIntosh, who has been working quietly, but steadily, to make the turn, waiting only until he was satisfied as to the intrinsic value of his holdings.

It is whispered that the Crown Reserve people bit into a lemon when they tried to take over the property at a reduction from the original price agreed upon. Rumor is that they found the property even better than it was represented to them and now there will be a case of acidity in the mouth when it is learned that other capitalists have secured the prize, which they sought at a mere bagatelle of a price.

Mr. McIntosh does not by any means dispose of all his holdings in the camp. He still has the original Rochester and the Sunflower group, together with his associates, and has parted with his interests in this deal for not only a big cash consideration but reserve a fine block of stock.

Clyde A. Heller, president of the Tonopah Belmont, is the leading figure on the purchasing side. He is a rich Philadelphian, who is willing to take a chance if he gets a run for his money, and his associates are of the same mind.

The holdings of the new concern are seven claims and two fractions, the two Esperanzas, three extensions, Crown Point Extension, January and February Fractions and Combination Fraction.

The treasury of the new company will be the most strongly financed in the camp. Preparations are being made for the most extensive development work that the district has ever dreamed of. The new owners are going after the ore on the Tonopah plan, which made the camp discovered by Jim Butler one of the most productive on the continent.

Mr. McIntosh lived for a number of years in Tonopah and was intimately associated with the Tonopah-Belmont people, which made it possible for him to interest them in this camp.

## NEW CINNABAR M'NAB DECLARES DISCOVERY POSSESSES MERIT

TONOPAH STAMPEDERS ARE ENTHUSIASTIC OVER POSSIBILITIES OF DISTRICT.

From surface indications the cinnabar discovery twelve miles north-east of Mina, and three miles north of the Dunlap Copper company, owned by the Tonopah Mining company, is one of the greatest strikes reported in southern Nevada in recent years. A casual examination leads the observer to believe that the entire mountain containing cinnabar, silver and lead, while several specimens of the mercury bearing ore show gold. But one assay has been made and the chemical test shows the ore to average \$125 and \$200 to the ton, the mercury values alone being computed.

W. J. Douglas, Adolph Meyer, Al Wardle and W. W. Booth, who stampered to the district Thursday, returned this morning after spending two days going over the district and locating claims, and all were enthusiastic over the discovery. There is no doubt but that it is the long lost Hawthorne property, although it has been proven that the deposit was found four or five years ago and after a little work had been performed was abandoned without the discoverers realizing the presence of mercury in the ore.

This original find was made by Burgess of Manhattan, who ran a cut into the mountain side eight feet long and to a depth of six feet.

Chas. Keough, of Reese River, and Tom Pepper, of Mina, discovered the cinnabar deposit on June 6 while searching for two strayed cattle. Keough, who understands metallurgical conditions, noticed the resemblance to cinnabar carrying rock and made a brief examination of the deposit, satisfying himself and also Pepper of the nature of the formation. Ten days later the two returned to the district and started locating claims. A sample was sent to Goldfield for analysis and the returns justified the work accomplished.

Monuments were hastily placed upon the claims. Wednesday night, when the news of the discovery became general at Mina, a stampede resulted and those who joined in the rush spent the night locating claims. In the majority of cases the claims overlapped those already located, for in their haste the locators paid but little attention to previous monuments.

Rock containing the cinnabar is to be found over a wide area and the possibilities of the district are unlimited. At the original strike the formation is of quartzite in the lime with a volcanic capping. Further down the hill shale exists while on the north side of the hill a sort of a diabase is to be found. The trend is northwest and southeast.

Sol Summerfield, B. B. Shephard and J. Holman Buck have four locations about a quarter of a mile from the main strike and the formation is somewhat mixed, containing an altered diabase, schist and rhyolite. Specimens appear to contain lead and silver in addition to cinnabar.

The Tonopah stampeders speak in the highest terms of the manner in which they were treated by the Mina residents and also by Keough and Pepper. What little accommodations that were to be found at the camp of Keough and Pepper were placed at the disposal of the Tonopahites, while Sol Summerfield furnished the automobile in which the journey to and from the district was made.

Hawthorne in describing the discovery stated that he could see the light of the New Boston mill from the mound. New Boston was located between Sodaville and Mina and the old mill ruins and tailings dump are plainly discernable from the district. In addition the petrified trees, often described by Hawthorne are still standing.

Further analysis of the ore is being made in Tonopah today by Meyer who is a metallurgist, and is employed by the Nevada-California Power company as oil tester.

FRIDAY NIGHT DANCE IS LARGELY ATTENDED

The regular Friday night dance given by the Tonopah dancing school was largely attended last evening. Hereafter prize waltzes will be held at each dance which will add interest to the weekly affairs.

INTERFERENCE BY DEPARTMENT OF JUSTICE CAUSE OF HIS RESIGNATION.

(By Associated Press.)  
SAN FRANCISCO, June 21.—United States District Attorney John L. McNab announced today he had resigned his office. In a long telegram to President Wilson he requests the acceptance of his resignation immediately and says he feels forced to resign because of orders from the attorney general filing his hands in the prosecution of Maury Diggs and Drew Caminetti for white slavery and the Western Fuel officials for defrauding the government by short weight of coal and customs. He states he received orders to postpone indefinitely these cases despite his protest and a statement to the attorney general that efforts were made to tamper with the government's witnesses.

The telegram calls attention to the "hideous crime" of Diggs and Caminetti and McNab had been advised that the department of justice contained friends of the defendants who had "publicly boasted that through the political prominence of relatives they would not be prosecuted, and my hand would be stayed through influence at Washington."

McNab says upon receipt of orders in this case he prepared his resignation to take effect after the trial of the fuel cases, but before it was sent orders came to postpone action upon certain defendants. The resignation is the result.

He says: "In bitter humiliation I am forced to believe, what heretofore I had indignantly refused to believe, namely, that the department of justice was yielding to influence which would cripple or destroy the usefulness of this office, and I cannot consent to occupy the position of a mere automaton, to have the gull or innocence of rich powerful defendants, indicted by unbiased grand juries with overwhelming evidence, determined by Washington representations of the defendants without notice to me."

OWEN D. CONN SENTENCED TO SERVE TEN YEARS

(By Associated Press.)  
SAN FRANCISCO, June 21.—Owen D. Conn, "the hundred thousand dollar burglar," was sentenced today to ten years in the penitentiary. It is his sixth term.

PHILADELPHIA TENNIS PLAY LOSES AT LONDON

(By Associated Press.)  
LONDON, June 21.—Wallace Johnson of Philadelphia was defeated by F. G. Lewis of London in the final London lawn tennis championship today.

NATION-WIDE NEWSPAPER PUBLICITY.

From Maine to California, from the Canadian northwest to sunny Florida, every morning, every evening, every day, the news of the world is told in the newspapers which dot the land from ocean to ocean.

It is almost impossible to conceive the tremendous power of informing the public which is thus combined in these daily purveyors of the world's news.

In no way dissociated from this great national force for spreading news is an equally strong force for disseminating advertising information.

Those manufacturers who want to create a widespread demand, and who want a large distribution for their products recognize the influence of the newspaper and tell their story constantly in a dozen, a hundred, or a thousand cities and towns simultaneously.

Makers of nationally sold goods are realizing more and more every day that the daily newspaper offers a more economical and more efficient means of creating actual demand than any other advertising medium.

## CHILDREN WILL BE AFFORDED GOOD TIME FOURTH

COMMITTEE OF WOMEN NOW CANVASSING CITY SECURING FUNDS FOR AFFAIR.

The women of Tonopah are heading every effort to make this 4th not only the best one Tonopah has ever had but the most economical. Every penny is being saved in an effort to give the public the greatest possible benefit. At the suggestion of Mrs. Henry Schmidt the Tonopah Woman's club appointed a committee of five to consult with the gentlemen about plans.

At the citizens' meeting held at Mr. Epstein's offices this committee was endorsed by the business men, and Mrs. Davenport was made chairman. The other members of this committee are as follows: Mrs. Henry Schmidt, Mrs. P. O. McLeod, Mrs. R. R. Garcia and Mrs. McDonald. These ladies, together with the chairman will act as an advisory committee which will oversee all plans. Subcommittees have been appointed by this committee to carry out the work and as far as possible all the women of town are being asked to assist in various places. This is "a woman's fourth" and as the child is always nearest the heart of woman, it is the child whose happiness and comfort will be most thought of and as it is always true that when the grown folks make children happy they are finding the truest happiness for themselves, this promises to be not only a sane 4th, but a happy one.

The following telegram was received yesterday from Goldfield, in reply to a dispatch thanking the southern committee for the invitation extended to Tonopah to assist in celebrating the fourth in the neighboring city:

"Mrs. M. I. Davenport, chairman, etc., Tonopah, Nev. Dear Madam: We have your communication of June 18, in reply to an invitation of our Fourth of July committee to the citizens of Tonopah, to participate with us in a general Fourth of July celebration.

"We join with the patriotic citizens of Tonopah in the sentiment that Tonopah as well as every community, should observe the Fourth, that the reasons that made the Fourth of July memorable in our annals, might be inculcated in the minds of the rising generation. I recall that we had such a celebration in Goldfield some three years or so ago, when their elders celebrated with Tonopah, and it was greatly enjoyed by the children. As the manner of celebrating in Goldfield, this year, will appeal more to adults than to children, it is still our hope that many of Tonopah's citizens will join us in a joint celebration.

"Trusting that your celebration may be all that you hope for it, and assuring you of our highest esteem, we are, yours, etc.,

"The Tonopah-Goldfield Committee, by Chas. S. Sprague, chairman."

## HEROISM OF DAUGHTER FAILS TO SAVE MOTHER

INFUSION OF BLOOD AS ONLY HOPE TO SAVE WOMAN IS WITHOUT SUCCESS.

(By Associated Press.)  
SAN FRANCISCO, June 21.—The heroism of Gussie Silver, thirteen years old, the daughter who gave a quart of blood to save her mother's life, unavailing. The mother was accidentally overcome by gas. Infusion was the only hope but she died today. The operation was witnessed by Mayor Rolph and a number of prominent surgeons.

GOLD IN METEOR PROVES TO BE IRON AND NICKEL

(By Associated Press.)  
FRESNO, June 21.—The meteor found by Fred Williams, a rancher near Bakersfield, and believed to contain gold, was proved today to be only a combination of iron and nickel.

## CRACK ROWING TEAMS MEET TODAY ON THE HUDSON RIVER IN ANNUAL INTERCOLLEGIATE CHAMPIONSHIP

(By Associated Press.)

POUGHKEEPSIE, N. Y., June 21.—Before the sun sinks behind the Palisades of the Hudson river this evening the intercollegiate rowing championship of the United States will have been won and lost in a series of three races in which seventeen crews are entered to compete. The national character of the intercollegiate regatta this year is shown by the fact that of the twelve colleges which support crews, six are represented on the river here today, while several of the others have been eliminated by the preliminary contests. Against the four eastern university squads representing Columbia, Pennsylvania, Cornell and Syracuse, will be pitted the University of Wisconsin from the middle west and the University of Washington's Pacific coast champion crew.

The oarsmen from Seattle have already defeated the crews of the University of California and Leland Stanford university, while Cornell has triumphed over Harvard. Columbia's varsity eight won from both Princeton and the navy in a triangular regatta on Carnegie lake May 17, leaving only Yale, which did not row a preliminary contest, unaccounted for. While none of these races were over a four mile course, the crews afforded a fair line on the respective abilities of competing crews.

The winner of the long four mile pull from Krum Elbow to the finish line a mile below the Poughkeepsie bridge, will be generally acclaimed, therefore, the championship eight of the year. It is this test and the hope of victory that have set the nerves of both oarsmen and spectators atingle today. Strange to say there is no pronounced favorite for the feature and final race of the day. All coaches concede that the average in speed and endurance is considerably above the usual standard, and are chary about naming winners in advance. Cornell, because of the prestige of both Coach Courtney and the records of his crews in the past, has the usual heavy following, while Wisconsin, Columbia and Syracuse are not lacking in adherents.

Unusual interest is attached to the Washington crews which crossed the continent, after winning the Pacific coast rowing laurels, to measure blade work and stamina with the pick of the eastern college crews. Last year the university of Stanford eight made the same journey. Without the services of a coach and in a borrowed shell the California crew finished last. Coach Conibear and his veteran eight from the northwest are far more optimistic. While not proclaiming themselves victors the Seattle oarsmen contend that they will uphold the honor of the far coast crews and show that the standard of collegiate rowing is not greatly below that of the east.

In the minor events the freshmen eight oared race is expected to bring out five of the best junior crews yet seen on the Poughkeepsie course. All of the colleges except Washington are entered in this event, with Cornell the favorite because of past performances. The four oared race will, for the first time in the history of the association, be a contest between six crews, every college being represented. In this race the guiding of the shell is not done by a coxswain and the ability of the bow man, who steers the shell with his feet, to keep the boat in a direct course is a most important factor in the race. The Washington four oared crew has been working under a disadvantage from the fact that it has no shell and used a Cornell boat during practice.

The intercollegiate regattas have been held annually on the Poughkeepsie course with one exception since 1895. The exception was the regatta of 1898, which was rowed at Saratoga. During this uninterrupted series Cornell has won eleven varsity races; nine four oared events, and ten freshmen contests. Pennsylvania colors have shown in front in three varsity contests; two four oared rows and one freshmen event. Syracuse has won two varsity struggles; two freshmen races and three four oared events. Wisconsin's victories consist of two freshmen eight oared races.

TONOPAH MERCHANTS WILL DERIVE HUGE BENEFIT FROM NEW TARIFF.

The low freight rates effective July 1, will be adopted within Nevada on the Southern Pacific line. A wide area will be benefited.

An illustration of what the new rates mean to business men, farmers and citizens generally in the state, is the following comparative statement of rates between Reno and Lovelock:

Old Rates	New Rates
per 100 lbs.	per 100 lbs.
First class, 85 1/2 cents.	57 cents
Second class, 85 1/2 cents.	48 cents
Third class, 62 1/2 cents.	42 cents
Fourth class, 58 1/2 cents.	37 cents
Fifth class, 51 cents.	34 cents

The order of the commission makes similar reductions to other points out of Reno, including points as far distant as Tonopah, Goldfield and Golconda. It is also said that freight rates out of Elko, Winnemucca and Wells to points within Nevada are to be lowered decisively July 1.

The new arrangement will undoubtedly prove to be of the greatest benefit to the entire state. It is looked upon by those who have been advised of the situation as an indication of better times for Reno, Elko, Winnemucca and in fact the entire state. To wholesalers it means the opportunity of widely increasing both the territory covered and the classes of goods which can be handled profitably in competition with jobbers from outside cities.

BULGARIANS TO ATTACK SERBIANS AND GREEKS

(By Associated Press.)  
VIENNA, June 21.—An attack by Bulgarians on the Servians and Greeks is expected in Macedonia. Three brigades of Montenegrin's infantry is hurrying to join the Servians.

Unusual interest is attached to the Washington crews which crossed the continent, after winning the Pacific coast rowing laurels, to measure blade work and stamina with the pick of the eastern college crews. Last year the university of Stanford eight made the same journey. Without the services of a coach and in a borrowed shell the California crew finished last. Coach Conibear and his veteran eight from the northwest are far more optimistic. While not proclaiming themselves victors the Seattle oarsmen contend that they will uphold the honor of the far coast crews and show that the standard of collegiate rowing is not greatly below that of the east.

## FLOODS RETARD SINKING POTASH RAILROAD VALLEY

NEW HOLE WILL BE STARTED AS SOON AS EQUIPMENT CAN BE MOVED.

D. H. Walker, superintendent for the Railroad Valley company, returned last evening from a trip to Nye county, where the company is operating, says the Examiner. It was his expectation to get the new drill hole started to prospect for potash seven miles south of the first hole, but such heavy rains have been experienced recently that the part of the valley where the work is to be done is under water. Within a couple of days, however, all the drilling equipment will be moved and in about a week work should be started on the hole. A representative of the company manufacturing the rotary drills will soon be here to visit the valley and familiarize himself with the Railroad Valley operations.

MINERS UNION WILL HOLD FUNERAL TODAY

The funeral of the late John Olson, who died several days ago at the miners hospital from pneumonia, will be held at 4:30 o'clock this afternoon from the undertaking parlors of Wonnacott and Cavanaugh. The services will be held under the auspices of Tonopah Miners union.

JUDGE AVERILL OFF TO ENJOY VACATION

District court will not convene until July 10, as Judge Averill departed his morning for Berkeley, Calif., where he will spend his annual summer vacation. No cases have been set for trial during the next three weeks.

MOTORCYCLE RIDERS HOLDING CONVENTION

(By Associated Press.)  
SAN JOSE, June 21.—The first state convention of American motorcyclists will be held here tonight. Many delegates are present.

## CHICKEN HOUSE IS DESTROYED; NO LOSS OF LIFE

NORTHERN DISTRICT IN NEED OF FIRE PROTECTION IS DEMONSTRATED YESTERDAY.

The need of the northern district for fire protection was called to mind late yesterday afternoon when the department strung 1200 feet of hose in an effort to reach a burning chicken house near the Standard Oil works. Practically 2000 feet of additional hose was needed to reach the scene, and as a result the fire department was forced to stand by and watch the building be consumed.

The building was owned by Hugh O'Hara and had formerly been used as a chicken house, although not in use for some time. It is believed that the fire was caused by broken glass transmitting the sun's rays upon some inflammable object.

With the aid of hand chemicals the department extinguished the embers after the building had been destroyed. It was impossible to attempt to save the structure as no water was to be had in the vicinity.

AUTO BREAKS AXLE WHILE MAKING TURN

An automobile accident was averted this morning on Main street only through the driving of Jack Sellstrom, of the West End company. The West End car while making the turn into Main street from Brougher avenue, broke a front axle. Fortunately the machine was not traveling at a fast speed and Sellstrom brought it to a full stop immediately. S. H. Brady, general manager of the West End, who also occupied the car, was leaving for Manhattan to inspect interests in that camp, and continued the journey in another auto.

TEMPERATURE REPORT.

Highest temperature yesterday, 79; a year ago, 81.  
Lowest temperature last night, 57; a year ago, 42.

## GOOD TONNAGE WEEK'S OUTPUT IN LOCAL MINES

ESTIMATED VALUATION FALLS LITTLE SHORT OF QUARTER MILLION MARK.

Over 11,000 tons of ore were shipped by the various Tonopah mining companies to the mills during the past week. The exact tonnage is given as 11,111 tons with an estimated valuation, based upon the actual gross milling values of the ore, of \$243,290. The shipments were made as follows:

Tonopah Mining company, 3050 tons; Belmont, 3553; Montana Tonopah, 997; Tonopah Extension, 1113; West End, 965; MacNamara, 583; Jim Butler, 400; North Star, 300; Tonopah Merger, 100; Midway, 50.

ORDERS POLICE NOT TO MOLEST BEER WAGGONS

(By Associated Press.)  
TOPEKA, Kan., June 21.—A temporary restraining order preventing officials of Kansas City, Kan., from arresting drivers of brewery wagons on the petition of five brewing companies operating in Kansas City, Mo., was issued today in the federal district court.

The Kansas City (Kan.) ordinance against which the injunction is directed was passed several weeks ago in the course of a campaign for more strict enforcement of the Webb law and the state law of Kansas controlling interstate shipment of liquor.

DISGUISED MILITANT ESCAPES.

(By Associated Press.)  
LONDON, June 21.—Miss Lillian Lenton, the militant suffragette who was convicted of having started a fire in the Kew tea garden pavilion and who has given the police much trouble, has escaped in man's clothes from the house where she was living in Leeds pending the expiration of her license.

A store that advertises must be a store of values—of "gargains" or the advertising would not pay.
